EXECUTIVE SUMMARY

Linda Theron, D.Ed., is a **full professor** in the Department of Educational Psychology, Faculty of Education, University of Pretoria; an associate of the Centre for the Study of Resilience, University of Pretoria; and an extraordinary professor in Optentia Research Focus Area, North-West University, South Africa. She is registered with the Health Professions Council of South Africa as an educational psychologist.

Linda is a respected for **resilience-focused research** that has contributed a more profound understanding of why some South African children and young people do well in life, despite the odds being stacked against them. In particular, she is credited with flagging how sociocultural context and historical legacy shape the resilience processes of black South African youth who are challenged by structural disadvantage. Her work highlights the complex contributions of education and teachers as well as traditional African values to the resilience processes of disadvantaged South African youth and distils lessons regarding how best educational psychologists can champion the resilience of African children.

Google Scholar (May 2017) rates Linda's h-index as 19 (2011-2017) and lists 1136 citations of her work. **Leading international resilience scholars** (e.g., Ann Masten, Michael Ungar) **cite Linda's work**. In 2013, the **Education Association of South Africa awarded Linda a research medal** in acknowledgment of her resilience-focused research with South African youth and teachers. Further evidence of respect for her work lies in an **invitation by Springer publishers for Linda to lead-edit a volume** detailing *how culture enables and constrains the resilience processes of young people worldwide*. This volume, showcasing 17 contributions from **African, North and South American, Australasian, Asian, and European scholars** (and their co-authors), was published in 2015.

Together with Michael Ungar (Canada Research Chair in Child, Family and Community Resilience & Director, Resilience Research Centre, Dalhousie University, Canada) Linda will co-deliver a **keynote address** at the **Pathways to Resilience IV International Conference** (14-16 June 2017, Cape Town). Linda has also been invited to **deliver resilience-focused keynotes** at the **South African Association for Child & Adolescent Psychiatry and Allied Professions & African Association for Child & Adolescent Mental Health** (7-9 September, Stellenbosch) and at the **1st African Conference of Positive Psychology** (4-7 April 2018). Linda delivered a resilience-&-culture-focussed **keynote address** at the **3rd World Congress of Resilience** (Canada, August 2016). She **led a concurrent plenary panel**, focused on the resilience processes of African young people, at the Pathways to Resilience III International Conference (Canada, June 2015).

Proof of Linda's scholarship is also evident in her leadership, principal co-investigation, and/or co-investigation of/in **funded research projects that have leveraged approximately R8,000,000.00** (since 2005). As a result, Linda has a track record of **productive networks with high-profile resilience-focused researchers** in Brazil, Canada, Colombia, China, Finland, Ireland, New Zealand, and South Africa. This has animated additional national and international networks: Linda was invited to head the South African resilience team collaborating in the multi-country Youth Resilience Project of the Worldwide University Network.

Her scholarship has attracted **36 postgraduate students** (supervised to completion) and **three postdoctoral fellows**, all of whom represent **South Africans who were historically disadvantaged** because of sex and/or race. Since 2005, her funded resilience projects have facilitated funding for their studies and directed their research foci. A number of these ex-students are now associate professors, senior lecturers, and lecturers at South African HEIs or occupy key posts in provincial education departments.

As part of what she understands her research mandate to be, Linda has **purposefully transformed research findings into curricular content, as well as user- and/or community-friendly products** (e.g., resilience-supporting programmes; guidelines for teachers and educational psychologists; short-learning programmes accredited by North-West University) – these products include an **activist, social change agenda**. She has also documented the research methodologies that facilitated meaningful youth and community engagement. In particular, the value of Khazimula (a research-informed strategy to support youth resilience using indigenous insights) was recognised when Linda and her research team were **finalists in the 2013-2014 NSTF-BHP Billiton Award** (individual/team research leading to innovation) and recipients of **the NWU Vice-Chancellor's Award**: service excellence in community engagement (applied research results).

The National Research Foundation, South Africa, rates Linda as an internationally acclaimed researcher (2017-2022).
